Square is the stronger and safer business. Beximco is the faster-growing one, with a thinner financial cushion.

SQUARE IS MORE PROFITABLE

- Net margin: 31.4% vs 14.2% for Beximco.
- Return on equity: 17.1% vs 12.3%

SQUARE HAS STRONGER BALANCE SHEET

- Current ratio: 12.8 vs 2.8
- Debt to equity: 0.01 vs 0.09
- Cash of about 55 billion taka, far above its debt
- Beximco still has net debt of about 3.3 billion taka

BEXIMCO IS GROWING FASTER

- Revenue growth 2022 to 2025: 12.3% vs 9.8% a year
- Net profit growth: 11.9% vs 9.7% a year
- More sales per taka of assets (0.67 vs 0.52), but holds stock longer (185 vs 120 days)

WHY THE GAP? : Square's higher net margin comes largely from investment income and associate profits, not only from selling medicines (details on the Notes page)

CONCLUSION

- Square has the stronger financial position today: higher margins, large cash reserves, almost no debt
- Beximco is the faster-growing company, with a thinner cushion if conditions turn

2021 | 2022 | 2023 | 2024 | 2025

Summary

	Beximco	Square
Revenue	49.12bn	76.29bn
Net Margin %	14.25%	31.42%
Net Profit Growth %	19.3%	14.5%
ROE	12.26%	17.13%
ROA	9.56%	16.33%
Current Ratio	2.83	12.80
Quick Ratio	1.22	10.56
Debt to Equity	0.09	0.01
Interest Coverage	9.93	95.21
Operating Margin %	20.05%	26.81%

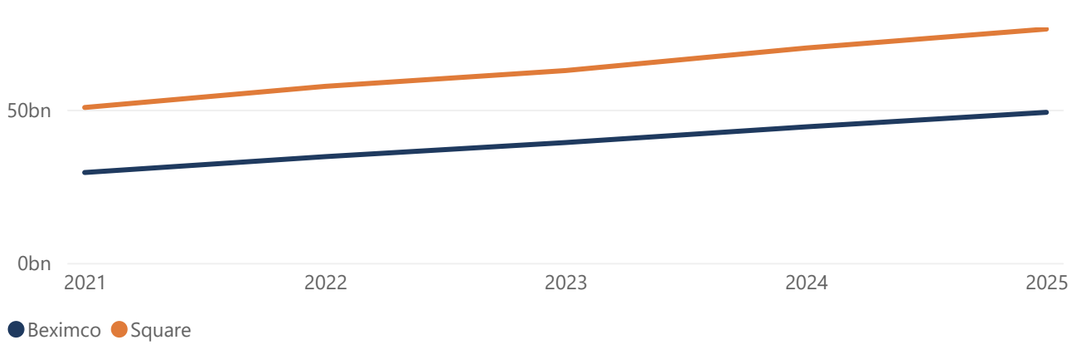

Square is bigger, but Beximco is growing faster

Growth report

Company	Revenue CAGR 2022-2025	Net Profit CAGR 2022-2025
Beximco	12.32%	11.87%
Square	9.82%	9.70%

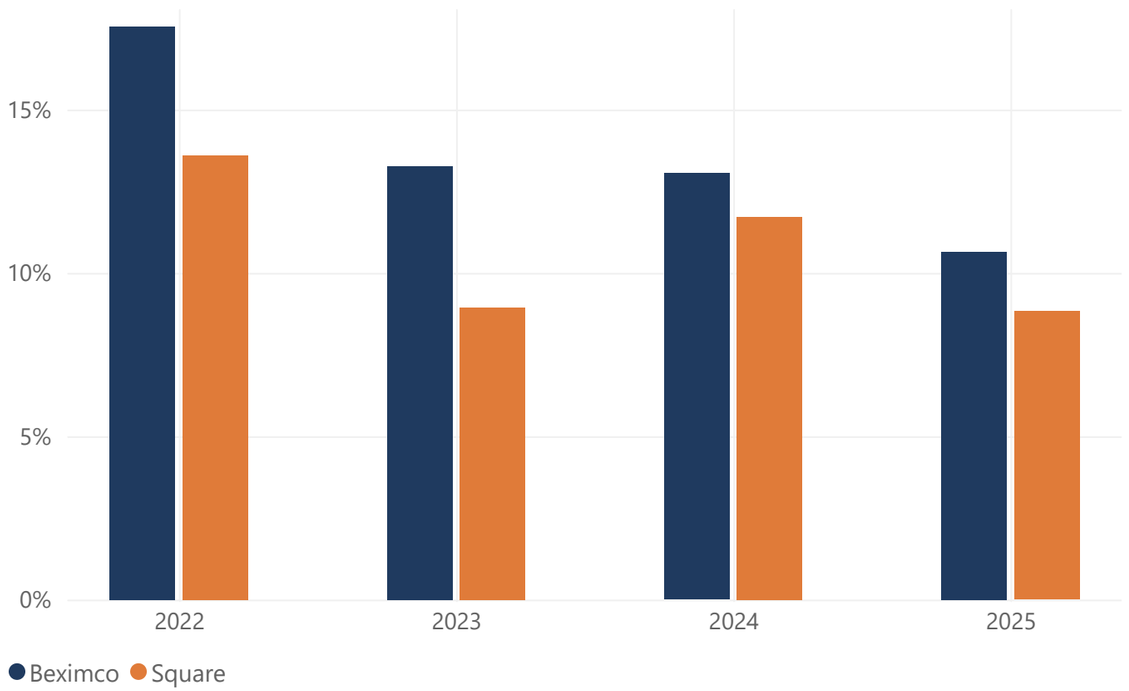

Revenue

by Year and Company

Revenue Growth %

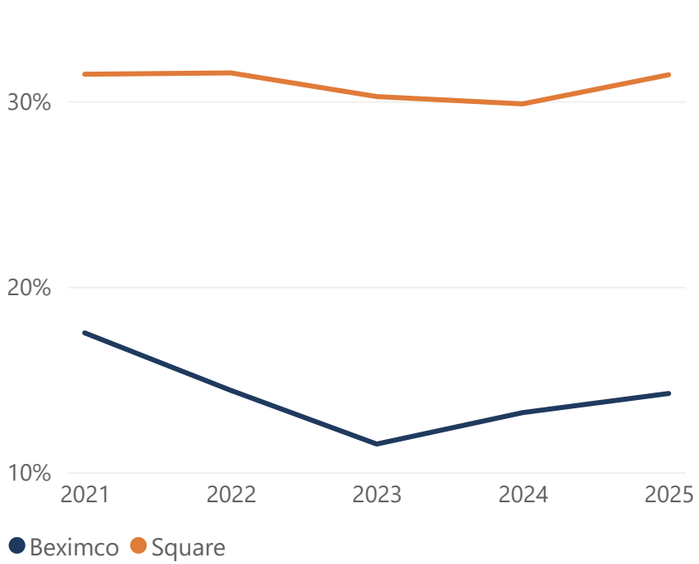

Year-on-year change in revenue

Square keeps 31 taka of every 100 taka in sales, Beximco 14.

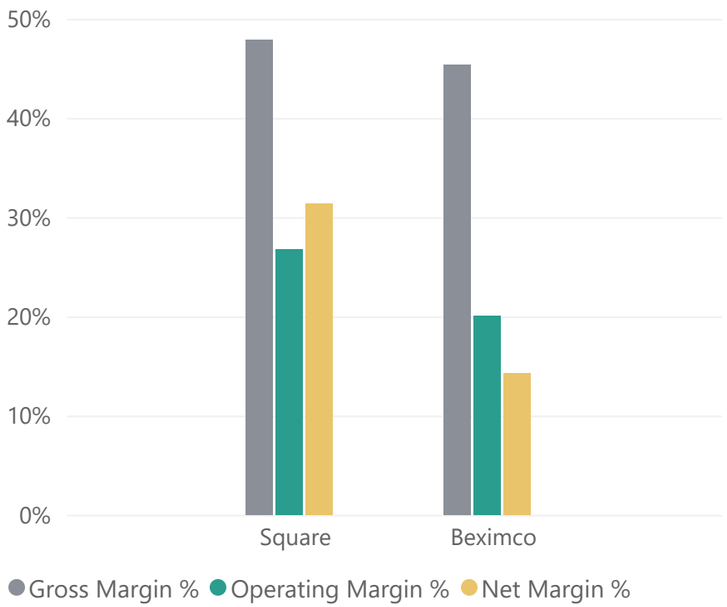

Net Margin

Margin of Both Giants(in percent%)

Gross, Operating and Net Margin

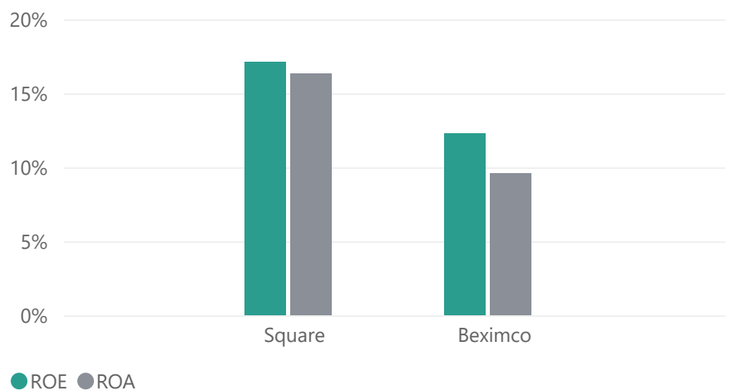

In percent(%)

2021 | 2022 | 2023 | 2024 | 2025

ROE and ROA by Company

Return on 'Equity and Asset'

2021 | 2022 | 2023

2024 | 2025

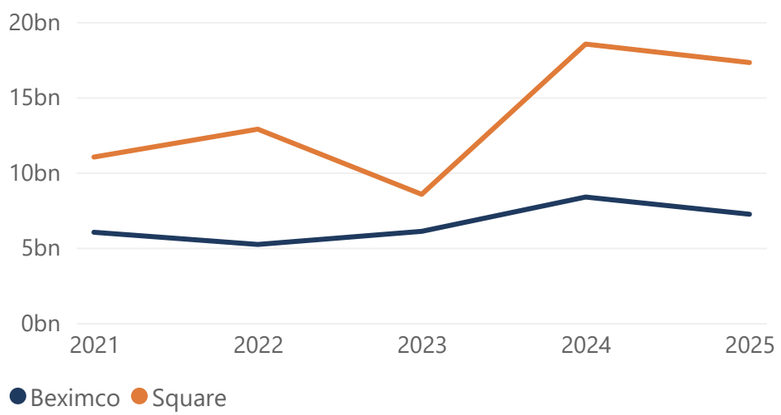

Square holds more cash than debt. Beximco's borrowing is modest, but its cushion is much thinner.

Health of the Pharma Giants

	Beximco	Square
Current Ratio	**2.83**	**12.80**
Quick Ratio	**1.22**	**10.56**
Debt to Equity	**0.09**	**0.01**
Interest Coverage	**9.93**	**95.21**
Cash Flow to Current Liabilities	**0.86**	**2.97**

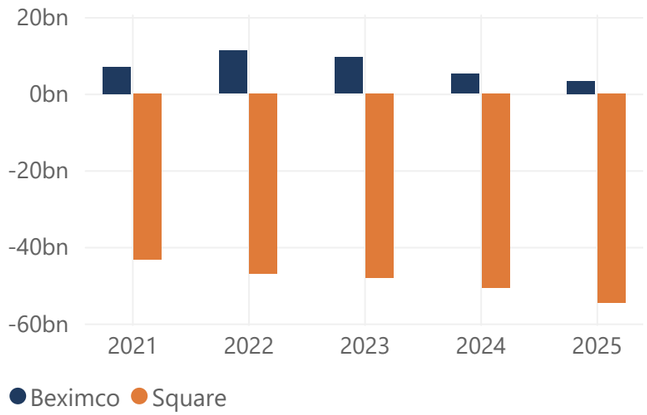

Operating Cash Flow

Liquid Stream of Square and Beximco

Net Debt

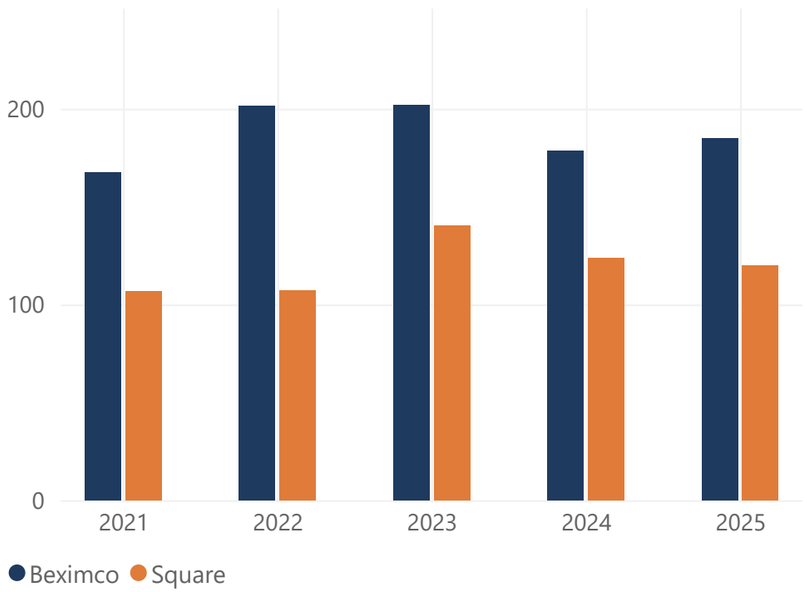

Cash or Liability which is greater?

Beximco squeezes more sales from its assets, Square collects and sells faster

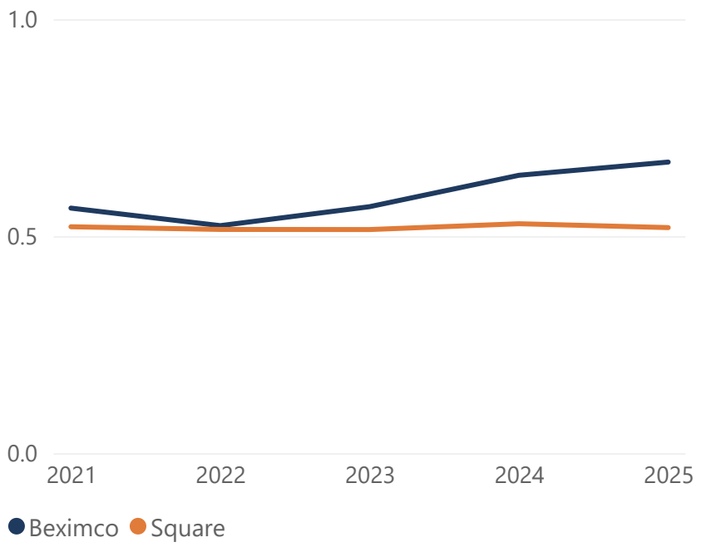

Inventory Days

Average days the companies take to sell the stock

Asset Turnover

Efficiency in generating revenue from asset

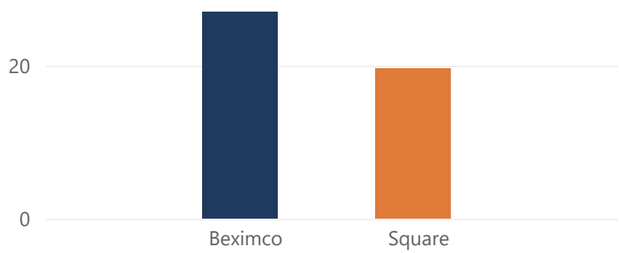

2021 | 2022 | 2023

2024 | **2025**

Receivable Days by Company

Average day to collect the receivables

NOTES

DATA

- Source: published financial statements of Beximco and Square, 2021 to 2025, in Bangladeshi Taka
- Statements were checked for consistency: subtotals, balance sheet totals and cash flow totals all reconcile
- The dashboard shows the year selected in the slicer (2025 by default)

HOW THE MEASURES ARE DEFINED

- Net margin = profit for the period ÷ revenue
- Operating margin = operating profit ÷ revenue. Square's operating profit excludes other operating income, so it matches Beximco's definition
- ROE and ROA = profit for the period ÷ year-end total equity or total assets (year-end balances, not averages)
- Debt = long term borrowings (current and non-current parts) plus short term borrowings. Net debt = debt minus cash
- Inventory days = 365 ÷ (cost of goods sold ÷ inventories). Receivable days = receivables ÷ revenue × 365
- Growth is year on year. CAGR covers 2022 to 2025

WHAT DRIVES THE GAP BETWEEN THE COMPANIES?

- Operating margin gap is modest: 26.8% for Square vs 20.0% for Beximco
- Net margin gap is much bigger (31.4% vs 14.2%) because of Square's investment income and its share of associate profits, about two-fifths of its profit
- So part of Square's strength comes from its investments, not only from selling medicines

CAVEATS

- Growth is measured from 2022 because Beximco's 2022 results include an acquired subsidiary, so 2021 is not fully comparable
- Square's 2024 and 2025 gross revenue and VAT are derived from the cash flow statement, not reported. They do not affect any ratio on the dashboard, which uses net revenue
- Square's interest coverage is very high because its finance cost is tiny, so compare it with care
- This is a comparison of financial statements for a project, not investment advice
